| PASS | high   | repository | morolitz | repository_secret_scanning_enabled     | Check if secret scanning is enabled to detect sensitive data in the repository        | 996978279  | Repository Manim has secret scanning enabled to detect sensitive data.                     | If secret scanning is not enab <a href="#">read more...</a> | Enable secret scanning in the <a href="#">read more...</a>  | •CIS-1.0: 1.5.1 |
| PASS | high   | repository | morolitz | repository_dependency_scanning_enabled | Check if package vulnerability scanning is enabled for dependencies in the repository | 996978279  | Repository Manim has package vulnerability scanning (Dependabot alerts) enabled.           | If package vulnerability scann <a href="#">read more...</a> | Enable Dependabot alerts or an <a href="#">read more...</a> | •CIS-1.0: 1.5.5 |
| PASS | high   | repository | morolitz | repository_dependency_scanning_enabled | Check if package vulnerability scanning is enabled for dependencies in the repository | 521629429  | Repository ingecarpus-main has package vulnerability scanning (Dependabot alerts) enabled. | If package vulnerability scann <a href="#">read more...</a> | Enable Dependabot alerts or an <a href="#">read more...</a> | •CIS-1.0: 1.5.5 |
| PASS | medium | repository | morolitz | repository_inactive_not_archived       | Check for inactive repositories that are not archived                                 | 1070847541 | Repository Integral_Security has been active within the last 180 days (0 days ago).        | Inactive repositories that are <a href="#">read more...</a> | Review inactive repositories a <a href="#">read more...</a> | •CIS-1.0: 1.1.8 |
| PASS | medium | repository | morolitz | repository_inactive_not_archived       | Check for inactive repositories that are not archived                                 | 996978279  | Repository Manim has been active within the last 180 days (123 days ago).                  | Inactive repositories that are <a href="#">read more...</a> | Review inactive repositories a <a href="#">read more...</a> | •CIS-1.0: 1.1.8 |

Como se puede observar se corrigieron algunos de los errores criticos y altos, haciendo las correcciones indicadas en el analisis como configurar los dependabots, las reglas de las branches y demas

no se pudo corregir todas ya que hay correcciones que no son posibles como lo es archivar el repositorio porque actualmente esta activo y al archivarlo se perderia ese espacio para trabajar, ademas de que en la cuenta MoroLitZ se encuentran repositorios que se trabajan en conjunto y de los cuales no cuento con los permisos suficientes para poder modificar las configuraciones de este, por ende quedan algunas brechas de seguridad que deberian ser corregidas por el administrador de ese repositorio, sin embargo no representa un GRAN peligro ya que son problemas medios o bajos.
